# company profile

## da 45 anni

la **Telcom SPA** si distingue per lo sviluppo di prodotti innovativi realizzati in materie termoplastiche, che contribuiscono in vario modo a migliorare la qualità della vita di chi li utilizza, unendo design italiano, solidità e funzionalità.

Elemento determinante del successo aziendale su scala mondiale è la capacità di rinnovare e migliorare costantemente i propri prodotti, grazie all'utilizzo di tecnologie all'avanguardia, alla formazione continua dei propri collaboratori all'interno dell'Azienda ed ad un attento ascolto del mercato.

Telcom, per garantire i migliori prodotti e servizi ai suoi clienti, attua efficacemente una strategia aziendale di integrazione verticale dei processi, valorizzando al meglio le competenze ed il know-how maturati nel corso degli anni.

**Ogni prodotto Telcom è dunque il risultato di elevata affidabilità e professionalità.**

I designers Telcom ideano e progettano il prodotto nei minimi dettagli, di cui autentici artigiani del legno creano in officina il modello per lo stampo.

Ogni linea ed ogni particolare sono curati con meticolosa attenzione, per raggiungere un risultato finale di impeccabile qualità.

**Tutti i prodotti della linea Vasar sono realizzati in materiali riciclabili e con formulazioni di materie prime atossiche.**

## EN

From 45 years Telcom Spa is distinguished by the development of innovative products made of thermoplastics, which contribute in various ways to improve the quality of life of those who use them, combining Italian design, strength and functionality.

A decisive factor in the success of the company on a global scale is the ability to constantly renew and improve its products, thanks to the use of cutting-edge technology, continuous training of its employees within the Company and attentive listening to the market.

Telcom, in order to guarantee the best products and services to its customers, effectively implements a business strategy of vertical process integration, making the most of the skills and know-how gained over the years.

Each Telcom product is therefore the result of high reliability and professionalism.

Telcom designers conceive and design the product in the smallest details, of which authentic wood craftsmen create the model for the mold in the workshop.

Each line and every detail are treated with meticulous attention, to achieve a final result of impeccable quality.

All Vasar products are made of recyclable materials and with formulations of non-toxic raw materials.

## DE

Seit 45 Jahren zeichnet sich Telcom spa durch die Entwicklung innovativer Produkte aus Thermoplasten aus, die auf verschiedene Weise dazu beitragen, die Lebensqualität der Benutzer zu verbessern, indem sie italienisches Design, Stärke und Funktionalität kombinieren.

Ein entscheidender Faktor für den Erfolg des Unternehmens auf globaler Ebene ist die Fähigkeit, seine Produkte dank des Einsatzes modernster Technologien, der ständigen Schulung seiner Mitarbeiter im Unternehmen und des aufmerksamen Markthörens ständig zu erneuern und zu verbessern.

Um den Kunden die besten Produkte und Dienstleistungen zu garantieren, setzt Telcom effektiv eine Geschäftsstrategie der vertikalen Prozessintegration um und nutzt so die in den letzten Jahren erworbenen Fähigkeiten und Kenntnisse.

Jedes Telcom-Produkt ist daher das Ergebnis hoher Zuverlässigkeit und Professionalität.

Die Designer von Telcom konzipieren und entwerfen das Produkt bis ins kleinste Detail, von dem authentische Holzhandwerker in der Werkstatt das Modell für die Form erstellen.

Jede Linie und jedes Detail wird mit größter Sorgfalt behandelt, um ein Endergebnis von einwandfreier Qualität zu erzielen.

Alle Vasar-Produkte werden aus wiederverwertbaren Materialien und aus ungiftigen Rohstoffen hergestellt.

## FR

Depuis 45 ans TELCOM se distingue pour le développement de produits innovants réalisés en matériaux thermoplastiques, qui contribuent, de différentes façons , à améliorer la qualité de vie de qui les utilisent en mettant ensemble le Design Italien, la robustesse et la fonctionnalité.

Eléments déterminants du succès sur échelle mondial de Telcom est la capacité de renouveler et améliorer de façon constante ses produits avec des technologies avancées, à travers la formation continue de ses collaborateurs internes et surtout à une écoute attentive du marché.

TELCOM à fin de garantir les meilleurs produits et services à ses clients, met en œuvre efficacement une stratégie d'intégration verticale des processus, mettant à profit les compétences et le Know how acquis au fil des ans.

Chaque produit Telcom est donc le résultat d'une crédibilité et d'un professionnalisme élevés.

Les DESIGNERS Telcom conçoivent le produit dans les moindres détails, à partir d'authentiques artisans du bois qui créent en atelier le modèle pour le moule.

Chaque ligne et chaque détail sont considérés avec une attention méticuleuse, pour obtenir un résultat final de qualité irréprochable.

Tous les produits Vasar sont réalisés à partir de matériaux recyclables et avec des formulations de matières premières non toxiques.

## ES

Durante 45 años Grupo Telcom ha dedicado un gran esfuerzo y toda su experiencia en la producción de formados termoplásticos inyectados o por rotomoldeo contribuyendo al medio ambiente y a la vez combinando diseño Italiano, resistencia y funcionalidad.

La clave del éxito de nuestra compañía a escala global es nuestra capacidad de innovar y desarrollar constantemente nuevos productos gracias al uso de tecnologías de vanguardia de ultima generación y siempre gracias al equipo altamente cualificado que conforma nuestra compañía, desde nuestros ingenieros, nuestro almacén, equipo de producción y todos los responsables de marca que buscan la plena satisfacción de nuestros clientes.

Nuestra empresa garantiza los más altos niveles de calidad cumpliendo con las normativas europeas vigentes implementando así una estrategia empresarial eficaz.

Cada uno de nuestros productos es por lo tanto el resultado de una alta capacidad de conocimiento y profesionalidad.

Nuestros diseñadores de producto cuidan hasta el ultimo detalle, son auténticos artesanos de la madera a partir de la cual crean la pieza final que se producirá en el molde.

Todas nuestras líneas de producto pasan un estricto control de calidad para obtener un producto final que cumpla con las exigencias del mercado internacional.

Todos nuestros productos están hechos con materiales vírgenes y 100% reciclables, con materia prima de primera calidad y respetuosos con el medio ambiente.

La nostra qualità ha solide basi

## TELCOM E L'ENERGIA RINNOVABILE

TELCOM **ama l'ambiente** e vuole contribuire attivamente alla sua preservazione per le generazioni future.

Per questo grazie ad una superficie coperta da pannelli solari di **14.000 mq**, TELCOM è in grado di produrre in un anno ben **2.400.000 KW/h** di energia **pulita** e **rinnovabile**, in grado di soddisfare buona parte del proprio fabbisogno energetico.

### EN

TELCOM respect the environment and is actively involved in its preservation for all future generations. Thanks to 14.000 sqm solar panel covered area we can produce 2.400.000 KW/h clean and renewable energy, able to cover a good part of our energy need.

### DE

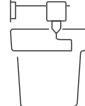

TELCOM ist Umweltschutzfreund und will zur Bewahrung des Umweltes für zukünftige Generationen aktiv beitragen. Mit 14.000 Qm Solarzellen -Oberfläche ist Telcom in der Lage sogar 2.400.000 KW/Stunde saubere und erneuerbare Energie zu erzeugen, die ein grosser Teil vom eigenen Energiebedarf decken kann.

### FR

**TELCOM ET L'ENERGIE RENOUVELABLE**  
Telcom aime l'environnement et veut contribuer promptement à sa préservation pour les prochaines générations.  
A ce sujet grâce à sur une surface recouverte de 14.000mq de panneaux solaires, Telcom est capable de produire bien 2.400.000 KW/h d'énergie propre et renouvelable qui satisfait une bonne partie de sa propre exigence énergétique.

### ES

Telcom ama el medio ambiente contribuyendo activamente a su preservación, por este motivo contamos en nuestras instalaciones con una cubierta compuesta por 14.000 m<sup>2</sup> de paneles solares capaces de producir en un año hasta 2.400.000 kw / h de energía limpia y renovable que cubre todas las necesidades energéticas de nuestra industria.

## QUANDO INNAFFIARE

Conviene innaffiare la sera nei mesi caldi, per evitare che l'acqua evapori prima di essere assorbita dalle radici, e la mattina nei mesi freddi per evitare ristagni durante la notte.

### WHEN TO WATER

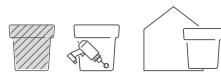

It is worthwhile to water the evening in the warm months, to avoid that water evaporate before being absorbed from the roots, and the morning in the cold months to avoid stagnation during the night.

*le piante pensano*

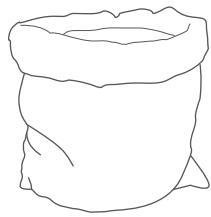

#### **LE PIANTE PENSANO:**

Le piante sono in grado di conservare memoria dell'ambiente esterno. La memoria potrebbe aiutare i germogli a conoscere fin dall'inizio le condizioni climatiche e ambientali in cui cresceranno, aumentando così la loro resistenza ai disagi che derivano dall'ambiente esterno, come la variazione di luce, l'assenza dell'acqua o le malattie di stagione.

#### **PLANTS «THINK»**

Plants are able to keep memory of the outside environment. This memory could help buds to identify long in advance the climate and environment conditions where they are going to grow, so they can withstand the outdoor uneasiness, such as variations of light, lack of water and season diseases.

## COME INNAFFIARE?

Sicuramente è importante dare acqua dall'alto con un getto delicato.

Fate molta attenzione a non bagnare le foglie delle piante che non lo desiderano, perchè si favorisce l'insorgenza di malattie crittogramme come funghi e muffe.

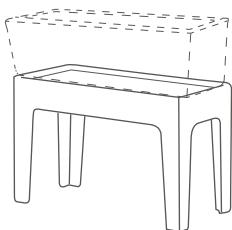

Se la terra di un vaso è troppo asciutta può succedere che l'acqua scorra nelle crepe senza essere assorbita dalle radici. In questo caso è necessario annaffiare lentamente e a più riprese.

## HOW TO WATER

Surely it is important to give water from above with a gentle throw. Pay much attention not to water the leaves which do not need it, because there would be an outbreak of fungal diseases and mold. If the pot soil is too dry it may happen that water flows through the cracks without being absorbed from the roots.

In this case it is necessary to water slowly and on several occasions.

# bouganville

## LO SAPEVI CHE...

Il bouganville è una pianta originaria del Sudamerica.

Sono adatte a siepi e pergolati nelle loro varietà rampicanti. Vengono coltivate come piante ornamentali per abbellire ed arricchire di colore il giardino.

Colori come il rosa, il fucsia e il viola sono i più frequenti per le bouganville.

Queste piante amano le esposizioni soleggiate.

Le possiamo ammirare soprattutto lungo i muri, nei cortili e vicino alle verande.

Oggi le bouganville sono diffuse in molte zone d'Italia e d'Europa, soprattutto nelle regioni dal clima mite.

## DID YOU KNOW THAT...

Bouganville comes from South America.

The climbing type is perfect for hedges and pergolas. It is grown as ornamental plant to spruce up the garden and make it more colorful.

Colours like rosa, fuchsia and purple are the most common colours for bouganville.

This plant loves sunny placement, we can admire it especially alongside walls, in courtyards and near patios.

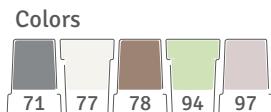

Nowadays you can find Bouganville in many areas in Italy and Europe, in particular in regions with mild weather.

## DRENAGGIO

Ogni contenitore deve avere alla base più fori per consentire la fuoriuscita dell'acqua in eccesso, sia quella piovana sia quella dell'irrigazione manuale. In questo modo si evitano ristagni che possono essere fatali per le radici causando marciumi, si consiglia pertanto un drenaggio con cocci grandi sul fondo da coprire con sassi o argilla più piccoli, seguito soprattutto sui vasi di grandi dimensioni o vasche da uno strato di geotessile altrimenti la terra dilaverebbe via facilmente.

## DRAINAGE

Each container must have several drainage holes on the bottom to let the excess raining and can water easily drain. This way you avoid waterlogging that can cause fatal putrefaction to the roots. It is recommended to make a good drainage with large clay pieces on the bottom, to be covered by pebbles or smaller clay pieces, and then by a nonwoven sheet – in larger pots – to prevent soil from coming out.

#### **LIMONI IN VASO**

I limoni hanno bisogno di luce e di aria umida, per evitare che le foglie si secchino. Collocatele quindi in un luogo all'esterno dell'abitazione dove possano ricevere per più tempo possibile la luce del sole e, soprattutto durante la bella stagione, assicuratevi che la pianta sia esposta alla luce per almeno 6-8 ore al giorno. Bisogna poi proteggere la pianta anche dal vento e dalle correnti d'aria. Per questo è preferibile metterla vicino alle pareti esterne della casa, lungo i lati soleggiati.

#### **POTTED LEMON TREES**

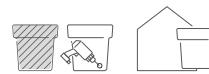

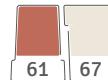

Lemon trees need lightness and humid air to prevent leaves from drying. Place them outdoor where they can get sunshine for most of the day, at least for 6-8 hours in the warm season. Protect the plant from the wind and air flows by placing it next to the outer housewalls, on the sunny sides.

NOVITÀ  
2019

*vasar suggerisce*

#### **VASI IN PLASTICA PRO**

I vasi in plastica sono i più diffusi, sono solidi quindi durano più a lungo, sono leggeri, facili e pratici da trasportare, moderni e costano poco, ed in estate conservano meglio l'umidità del terreno.

Non esiste un vaso ideale, ogni tipo di contenitore ha pregi e difetti che dovrete valutare prima dell'acquisto.

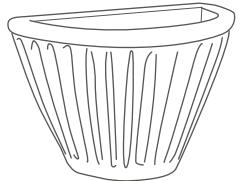

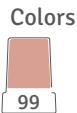

#### **RESIN POTS ADVANTAGES**

Resin pots are the most popular, are strong therefore last longer, are light, easy and practical to handle, modern, cheap, and in summertime maintain soil humidity better.  
An ideal pot does not exist, every type of container has strengths and weaknesses that you should evaluate before purchasing.

LINEA METROPOLI - VASAR 2019

## Metropoli / Olimpo Sottovasi / Accessori

I vasi della collezione Metropoli sono il miglior modo per portare la natura in ambienti indoor dal design contemporaneo o per arricchire progettazioni di giardini e roof garden dalle severe geometrie di architettura. Vasi dal carattere sobrio ed essenziale progettati con un unico intento: creare continuum tra spazio esterno ed interno.

The pots from Metropoli collection are the best solution to bring nature to contemporary design indoor areas or to decorate linear geometrical gardens and roof-gardens.

Pots with clean and essential shape designed with a unique intention: to create a continuum between outdoor and indoor.

### INIEZIONE Injection moulding/ Spritzware / Injection / Inyección

OLIMPO

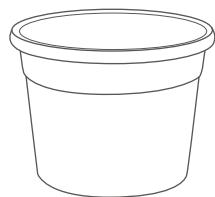

## LIVELLO TERRICCIO:

Un errore comunissimo è quello di sbagliare il livello di terriccio nel vaso.  
Due o tre cm dal bordo del vaso e non di più o di meno.

## SOIL LEVEL

A common mistake is to underestimate the importance of the soil level in the pot.  
The best solution is at two or three centimeters from the pot rim, not more nor less.

## DIMENSIONE VASI PER TRAPIANTI:

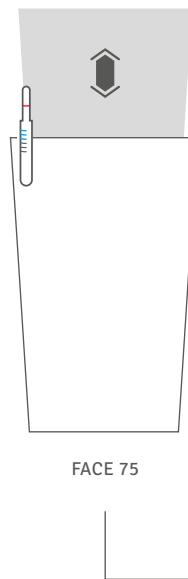

Vasi e piante devono essere proporzionati, il pane di radici deve trovare ampio spazio nel nuovo vaso che avete scelto, una buona regola consiste nel trapiantare la vostra pianta in un vaso che sia il 20% più grande rispetto al vecchio contenitore, pertanto un contenitore della misura appena superiore a quella del precedente.

### POT SIZE FOR TRANSPLANTING

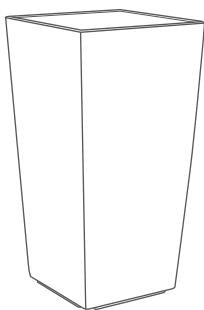

Pots and plants must be proportionate, the root plot shall be well settled into the selected pot. A good rule is to transplant your plant into a pot 20% larger than the old container, therefore the new pot shall be something bigger than the previous one.

## BANANE:

Lo sapevi che le bucce di banane sono ottime per nutrire le piante?  
Usate fin dai tempi dell'antichità come concime, recentemente si è scoperto che sono un ottimo concime per rose, basterà spezzettare la buccia di una banana e metterla nel terreno prima di piantare i vostri fiori.

## BANANAS

Did you know that banana peel is excellent to nourish plants?  
Used as fertilizer from ancient times, it turns out that it is a very good fertilizer for roses, you just need to cut banana skin into small pieces and put them in the soil before planting.
